Changes to 1.1 and 1.2 Since First Version

- SQL storage of "searches" (each set of terms, id of the search's newest tweet)
- Pagination of tweets
- Retrieval of tweets across multiple "pages" recursively
- Only querying twitter API for tweets since the search's newest stored tweet (since_id, newestTweet)
- Usage of sockets for query submission and search selection
- Fixed graph and tweet counts (frequency)
- Styling improvements
- Advanced tweet rendering (higher efficiency, reduced page load due to pages)
- Twitter query enhancements, ensure correct results
- Only retrieve cached tweets by default, button to query Twitter in addition
